

FABIHA LAEEQ

Data Science Trainee | Biotechnology Graduate

fabihalaeeq@gmail.com | 0333-3045995 | [linkedin.com/in/fabihalaeeq](https://www.linkedin.com/in/fabihalaeeq) | github.com/FabihaLaeeq | Karachi, Pakistan

PROFESSIONAL SUMMARY

Biotechnology graduate transitioning into AI & Data Science, currently training at SMIT in Python, machine learning fundamentals, and LLM-based workflows. Comfortable translating technical work into business context, drawn from research experience coordinating with domain experts, healthcare professionals, and field teams. Built and deployed an AI-powered data analysis web application end-to-end, demonstrating the ability to evaluate and adapt AI tools independently. Eager to support digital transformation initiatives by bridging local business needs and technical teams, with a strong interest in AI.

TECHNICAL SKILLS

- AI & LLM: Prompt engineering (ChatGPT, Claude, Gemini), OpenAI/Claude/Gemini API integration, NLP fundamentals, AI-driven insight generation, exploring AI Agents & RAG
- Programming & Data: Python (pandas, NumPy), Streamlit, REST APIs & JSON, Git basics, SQL, MS Excel (formulas, pivot tables), SPSS
- Business-Facing Skills: Cross-team coordination, translating technical findings for non-specialist audiences, structured documentation, process/workflow evaluation

PROJECTS & AI WORK

AI Data Analysis Assistant | *Personal Project* | Streamlit, Python, Gemini API | Live app + GitHub

- Built and deployed an end-to-end web application that performs automated exploratory data analysis on any user-uploaded CSV, including missing value/duplicate detection, summary statistics, and visualizations (distributions, box plots, correlation heatmaps, scatter plots)
- Integrated the Gemini API to generate AI-driven dataset insights and answer natural-language questions about uploaded data, translating raw statistics into plain-language explanations
- Implemented downloadable PDF report generation, taking the tool from analysis to a business-ready deliverable

LLM Prompt Engineering — Research & Data Workflows | *Personal / SMIT Training Project* | 2024 – 2025

- Designed structured prompts for ChatGPT and Claude to extract and summarize information from large scientific documents
- Built prompt templates for data annotation assistance, pattern extraction, and structured report generation
- Explored OpenAI and Claude API integrations for text-based automation tasks, documenting prompt versions and iterating on outputs

Microbial Data Analysis — Bacillus Species & Hydrolytic Enzymes | *Final Year Project, Dow University* | 2025 – 2026

- Collected, organized, and maintained structured datasets from multi-condition environmental experiments
- Applied statistical analysis (SPSS) to interpret enzyme activity data and identify patterns, following an end-to-end workflow from raw data to conclusions

Snake Envenomation Research Documentary | *Independent Research Project* | 2024

- Synthesized clinical and toxicological data from multiple sources, collaborating directly with healthcare professionals
- Communicated technical, cross-domain findings clearly to a non-specialist audience

EDUCATION

AI & Data Science Training | *Saylani Mass IT Training (SMIT), Karachi* | 2024 – Present

- Python programming, machine learning concepts, LLMs, prompt engineering, NLP basics, AI tools, Excel for data handling

BS Biotechnology | *Dow College of Biotechnology, Dow University of Health Sciences, Karachi* | 2022 – 2026

- Relevant coursework: Biostatistics, Bioinformatics, Microbiology, Molecular Biology
- Built strong foundations in data analysis, hypothesis testing, and scientific documentation

CERTIFICATIONS

- Microsoft Excel — Coursera
- SPSS Workshop
